

Lucas Zapico

Seattle, WA

Phone: 206.290.3635 | Email: zapicolucas@gmail.com | web: lucaszapico.github.io | LinkedIn: [in/lucasmmpzapico/](https://www.linkedin.com/in/lucasmmpzapico/)

Objective

My career objective is to produce value-adding products and experiences. I believe delivering quality takes time and effort and a desire to listen to customer needs and business constraints. What I bring to my teams is a creative analytic perspective that manifests itself in thoughtful designs and effective solutions.

Work Experience

Catapult Interactive

Designer and Developer:

Los Angeles, CA

March 2016 - July 2017

Led development in management and design roles meeting stakeholder targets on seven productions. Strategized and delivered architecture, design and development elements. Resulting in proof of concept in four technologies, and multiple iterations in enterprise applications.

Management

- Owned discovery and development of pre and post sales solutions for clients.
- Enabled communication and reporting of development statuses and production timelines to stakeholders.
- Managed local and international development teams.
- Setup and developed on-boarding process for suite of digital business tools.

Design

- Designed information architecture and user interfaces for mobile and web applications.
- Produced and curated digital content.
- Conducted and leveraged user experience research to meet business objectives.
- Contribute in branding process, including market research, producing branding suite.

Development

- Conducted grey box and black box quality assurance testing of applications and API's.
- Contributed to frontend development through styling and producing components.

Freelance

Designer and Developer:

Berlin Germany & Seattle, WA

September 2017 - present

Delivered comprehensive solutions content to enhance and develop a cohesive digital presence.

- Closely collaborated with clients to define brand identities and leverage information into marketing strategies.
- Produced infrastructures to manage assets creation and production for small business.
- On-boarded clients to modern production management pipelines and processes.
- Introduced user experience ideologies and practices to drive an audience to advocates.
